i410 Phone

User's Guide

Dummy Page - To be discarded before printing

DECLARATION OF CONFORMITY

Per FCC CFR 47 Part 2 Section 2.1077(a)

Responsible Party Name: Motorola, Inc.

Address: 8000 West Sunrise Boulevard
Plantation, FL 33322 USA

Phone Number: 1 (800) 453-0920

Hereby declares that the product:

Product Name: i410

Model Number: H76XAH6JR7BN

FCC-ID: IHDP56KR2

Conforms to the following regulations:

FCC Part 15, subpart B, section 15.107(a), 15.107(d) and section 15.109(a)

FCC Notice to Users

The following statement applies to all products that have received FCC approval. Applicable products bear the FCC logo, and/or an FCC ID in the format FCC-ID: IHDP56KR2 on the product label.

Motorola has not approved any changes or modifications to this device by the user. Any changes or modifications could void the user's authority to operate the equipment. See 47 CFR Sec. 15.21.

Class B Digital Device

As a personal computer peripheral, this device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. See 47 CFR Sec. 15.19(3).

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Industry Canada Notice to Users

Operation is subject to the following two conditions: (1) This device may not cause interference and (2) This device must accept any interference, including interference that may cause undesired operation of the device. See RSS-GEN 7.1.5.

use and care

To care for your Motorola phone, please keep it away from:

liquids of any kind

Don't expose your phone to water, rain, extreme humidity, sweat, or other moisture.

extreme heat or cold

Avoid temperatures below -10°C/14°F or above 45°C/113°F.

microwaves

Don't try to dry your phone in a microwave oven.

dust and dirt

Don't expose your phone to dust, dirt, sand, food, or other inappropriate materials.

cleaning solutions

To clean your phone, use only a dry soft cloth. Don't use alcohol or other cleaning solutions.

the ground

Don't drop your phone.

essentials

Caution: Before using the phone for the first time, read the Important Safety and Legal information included in the gray edged pages at the back of this guide.

about this guide

This guide shows how to locate a menu feature as follows:

Find it:  > **Settings**

This means that, from the home screen:

- 1 Press the *menu button*  to open the **Main Menu**.
- 2 Press the *navigation key* to scroll to **Settings**.

- 3 Press the  to select it.

symbols

This means a feature is network/subscription dependent and may not be available in all areas. Contact SouthernLINC Wireless for more information.

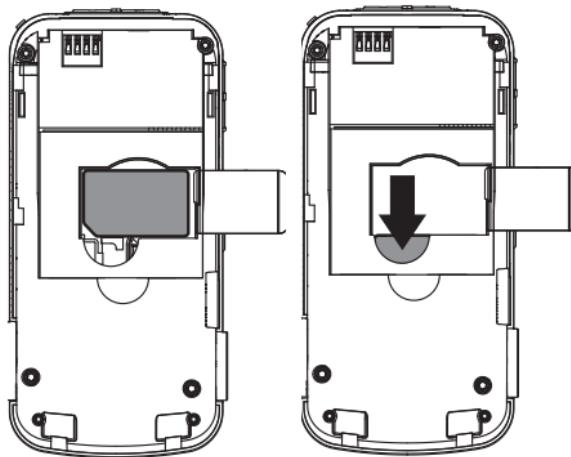

This means a feature requires an optional accessory.

SIM card

insert the SIM card

Turn off your phone and remove your battery before you install or remove a SIM card.

Carefully slide the SIM chip into your phone, until it lies flat in the SIM chip holder.

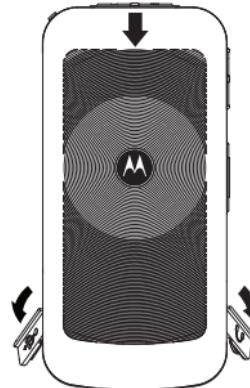

Warning: To avoid loss or damage, do not remove your SIM chip from your phone unless absolutely necessary.

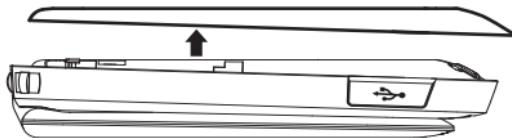

battery

battery installation

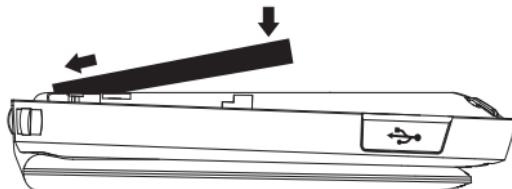

- 1 Open the micro-USB and headphone jack connector covers. Slide the battery door up until it is released.

2 Remove battery door.

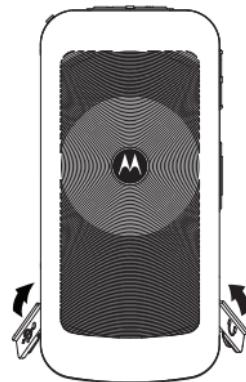

3 Insert battery as shown below. Push the battery down until it snaps in place.

4 Replace the battery door.

5 Close the micro-USB and headphone jack connector covers.

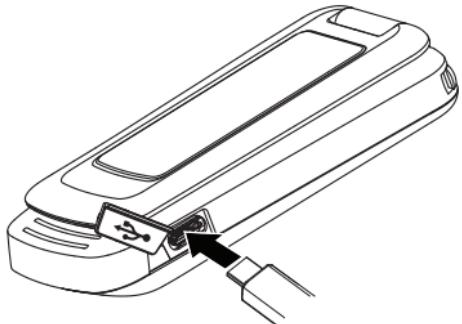

battery charging

New batteries are not fully charged.

charge using the charger

- 1 Pull out the connector cover, and insert the charger into the accessory connector on your phone as shown.

- 2 Plug the other end of the charger into the appropriate electrical outlet.

When you charge the battery, the battery level indicator at the upper right of the screen shows charging progress. At least one

segment of the indicator must be visible to ensure full phone functionality while charging.

charge from your computer

You can partially charge your phone's battery by connecting a Motorola-approved USB cable from your phone's micro-USB port to a high power USB connector on a computer (not a low-power one, such as the USB connector on your keyboard or bus-powered USB hub). Typically, USB high-power connectors are located directly on your computer.

Note: The phone will be charged at a slower rate than it is charged with the rapid charger.

Your computer must be turned on, and you must have correct software drivers installed on your computer. If the Phone is off when the USB cable is connected between the computer and the phone, the phone will

power up in charging mode. This mode allows the phone to charge fastest and quickest.

Note: If the battery is very low, the phone will not turn On, but it will continue to charge at a low rate. The phone will power up in charging mode when the battery has been charged to approximately 5% of its capacity.

If the phone is turned on while charging from a computer, it will not fully charge the battery. In this case, the battery charge will be maintained approximately between 80% and 95% of the battery's capacity. Cables and software drivers are available in Motorola Original™ data kits, sold separately.

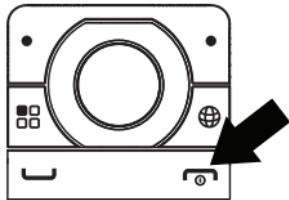

Tip: Motorola batteries have circuitry that protects the battery from damage from overcharging. Of course, unplugging the charger from the wall will prevent the battery from overcharging.

battery indicators

	The battery is at approximately 100% to 90% capacity when the indicator is blue and displaying three bars.
	The battery is at approximately 65% capacity when the indicator is green and displaying two bars.
	The battery is at approximately 10% capacity when the indicator is yellow and displaying one bar.
	The battery is at approximately 5% capacity when the indicator is red and has a flashing red bar.
	The battery is charging.

turn it on & off

To turn on your phone, press and hold  for a few seconds or until the display turns on.

Note: If you press  for more than four seconds, the handset will power "On" in "Transmitter Off" mode. See "transmitters" on page 38.

To turn off your phone, press and hold  for two seconds.

enable security

You must enable security the first time you power on your phone or within 10 days of first activation.

- 1 Press  under **Ok**.

- 2 You are prompted to enable security. Press  under **Yes**. A series of screens followed by the default home page displays.
- 3 Press  to return to the home screen.

make a phone call

Enter a phone number and press  to make a call or use a voice name. See "voice names" on page 42.

Note: For best call quality avoid covering the antenna with your hand.

To hang up press .

answer a phone call

When your phone rings and/or vibrates, you have the following options to answer:

- 1 If you want to answer the call on the handsfree speaker phone, press the speaker key  with the flip closed. To hang up press the smart key .
- 2 If you want to answer the call using the handset, just open the flip. To hang up press  or close the flip.

Note: You must have the **Flip Activation** feature On. See “advanced calling” on page 57.

make a push to talk call

Your PTT ID is the number at which you receive one-to-one Push To Talk calls.

Talkgroup numbers are numbers through which you receive one-to-many group calls.

To make a push to talk call

- 1 Enter the PTT ID you want to call.

- 2 Press and hold the PTT button. Begin talking after your phone emits a chirping sound.
- 3 Release the PTT button to listen.
To end the call press .

Note: A Push To Talk call ends automatically if there is no activity on the call for a few seconds.

Tip: To let someone know you want to talk to them on a Private call, press  under **Alert** and press the PTT button.

answer a push to talk call

- 1 When your phone emits a chirping sound or vibrates to indicate you are receiving a Private call, wait for the caller to finish speaking.

- 2 Press and hold the PTT button and begin talking after your phone emits a chirping sound.
- 3 Release the PTT button to listen.
To end the call press  under **Exit**.

talkgroup calls

A group call is similar to a Push To Talk call, but is made to all members of a Talkgroup at once.

Before you can make or receive group calls, a Talkgroup must be established. After the Talkgroup is established, you must join the Talkgroup.

joining a talkgroup

Your sales representative or your service provider establishes talkgroups for you and assigns each Talkgroup a Talkgroup number.

You can choose a name for each of your Talkgroups when you create entries for them in Contacts.

To receive group calls made to any of these Talkgroups, you must join the Talkgroup.

- 1 Press  under **Contacts**.

or

From the main menu, scroll to **Contacts** and press .

- 2 Scroll to the Talkgroup you want to join.
- 3 Press  under **Join**.

Note: You can only monitor one Talkgroup at a time.

making talkgroup calls

- 1 Press . Then enter the Talkgroup number using the keypad.
- or

Choose the Talkgroup name from Contacts or recent calls list.

- 2** Proceed as if making a Private call.

receiving talkgroup calls

To answer a group call:

- Proceed as if answering a Private call. Only one person at a time may speak on a group call.
- The Private ID or name of the person who is speaking will appear on the display below the Talkgroup number.

turning off talkgroup calls

To set your phone to prevent you from hearing group calls to your Talkgroup:

Find it:  > **Settings** > **Push to Talk** > **Tkgrp Silent** > **On**.

To set your phone to let you hear group calls to your Talkgroup:

Find it:  > **Settings** > **Push to Talk** > **Tkgrp Silent** > **Off**.

store a phone number or PTT ID

You can store a phone number or PTT ID in **Contacts**:

- 1** Press  > **Contacts** > **[New Contact]**.
- 2** Enter a name for the new entry. Each entry's name can contain up to 20 characters.
- 3** Select **Ringer** if you wish to assign a specific ring tone to that phone number.
- 4** Select a type for the entry (**Mobile**, **Private**, **Work1**, **Work2**, **Home**, **Email**, **Fax**, **Pager**, **Talkgroup**, **IP** or **Other**). To store a PTT ID, choose **PTT ID**.

- 5 Enter the number for the entry and press  under **Save** to save the entry.

Tip: Before saving the entry, you can save more information. You can store E-mail addresses, IP addresses, or Talkgroup IDs. You can assign each number a speed dial number and voice name.

After you have saved the number, the new Contacts entry is displayed.

call a stored phone number or PTT ID

Shortcut: From the home screen press  under **Contcts**

or

Find it:  > **Contacts**

- 1 Scroll to the **Contacts** entry.

Tip: By pressing the first letter of the name of the **Contacts** you want, you will be taken to all the contact names starting with the letter you pressed.

- 2 If the Contacts entry contains more than one number, scroll left or right until the type of the number you want to call is displayed (**Mobile**, **PTT ID**, **Work1**, **Work2**, **Home**, etc.).
- 3 If you choose a phone number, press  to call the entry.

or

If you choose a PTT ID or Talkgroup ID, press and hold the PTT button to call the number.

Tip: If the Contacts entry you scrolled to contains a PTT ID, you can make an instant Push To Talk call to that PTT ID by pressing and holding the PTT button, even if the PTT ID is not the type of number displayed.

your phone number and PTT ID

Find it: ☎ > My Info

Tip: Want to see your phone number or PTT ID while you're on a call? Press ☎ > My Info.

text messages

Your phone sends text messages using Mobile Originated Short Messaging Services (MOSMS) and receives text messages from other phones that are using MOSMS.

Note: The messaging menus may look slightly different, depending on the messaging setup of your phone.

set it up

Before you begin using text messaging, you may need to set up your signature, service center number, and expiration information.

Shortcut: From the home screen press ☰ under Mesg > Text Inbox or Text Outbox > ☎ > Text Msg Setup.

or

Find it: ☎ > Messages > Text Inbox or Text Outbox
☎ > Text Msg Setup

The following options become available:

option
Signature: Enter your signature (up to 11 characters long).
Delivery Rpt: Set this option to On if you want your phone to show you when the message has been delivered.

option

Srv Cntr No: Enter the phone number of your service center. If you do not know this number, contact SouthernLINC Wireless.

Expire After: This is the amount of time messages you send are saved at the service center if they cannot be delivered. After this period, they are discarded.

Scroll to select the number of days you want your messages to be saved.

Cleanup: Controls how long messages remain in the **Inbox** and **Outbox** before they are deleted.

Press  under **Done** to save the information you entered.

receive a text message

1 To view the message press  under **Read**.

2 To dismiss the message notification press  under **Back**.

Note: If your phone is powered off when you receive a text message, your phone notifies you the next time you power it on. If you are out of your coverage area, your phone alerts you when you return to your coverage area.

Tip: While reading a text and numeric message that contains a phone number, you can press  to call that number.

read from the message center

1 From the home screen press  under **Mesg** > **Text Inbox**.

2 Select the message you want to read or press the number of the message you want to read. If the message fills more than one screen, scroll to read it.

Tip: Scrolling through one message lets you view the next message.

- To reply to the message, press under **Reply** or to see all other choices, including forwarding and deleting the message, calling the sender, or storing the sender's number in **Contacts**, press .

create and send text messages

- From the home screen press under **Mesg > [Create Message]**.

or

Select **Text Inbox**, **Text Outbox**, or **Drafts**.

- Use the keypad to enter the recipient's phone number and press .

or

Highlight the **To:** field and press to display the **Send To** screen. Enter the recipient's phone number using the keypad or press under **Contcts**, and select the contact you want. You can have up to five recipients for the message.

- Select **Msg** and enter the text of the message or to use a quick note press under **Browse** and scroll to the quick note you want and press .

- Press > **Set Send Method** and select **Text**, **Fax**, **x400**, **Paging**, **Email**, **ERMES**, or **Voice**.

- If you want to send the message, press under **Send** or to delete the message without sending it, press under **Cancel**.

Note: If you want to request confirmation of delivery press > **Delivery Report** > **On**.

use drafts

When you save a message as a draft, it is saved in the **Drafts** folder.

Shortcut: From the home screen press under **Mesg > Drafts**.

- Select the draft you want to edit. You also have the choice to create new text messages from this menu.

- 2 To edit the fields you want to change, follow step 2 through step 5 in “create and send text messages” above.

resend text messages

Shortcut: From the home screen press  under Mesg > Text Outbox.

- 1 Scroll to the message you want to resend or press the number of the message you want to resend.
- 2 Press  and select Resend.

delete sent text messages

Shortcut: From the home screen press  under Mesg > Text Outbox.

- 1 Scroll to the message you want to delete.
- 2 Press  under Delete.
- 3 Press  under Yes to confirm.

delete all unlocked sent messages

Shortcut: From the home screen press  under Mesg > Text Outbox.

- 1 Press  > Delete All.
- 2 Press  under Yes to confirm.

manage memory

Your text inbox, outbox, and drafts folder have a set amount of memory available for storing messages.

The text inbox holds 20 messages. If the text inbox is full, you cannot receive messages until you delete some.

The outbox and drafts folder share memory space. Together they can hold 30 messages. If the outbox and drafts folder memory is full, you cannot send messages or save drafts until you delete some.

To view the amount of memory available in your text inbox, text outbox, or drafts folder:

- 1** From the idle screen press  under **Msg.**
- 2** Scroll to the folder whose available memory capacity you want to view.
- 3** Press  under **Memory**.

using your handset as a modem

Your phone can be connected to a computer via USB for use as a modem. For more specific information on how to setup your phone for use with your computer please visit www.motorola.com/support and look under the FAQ section.

main attractions

media center

The media center lets you access pictures and audio recordings stored in your phone's memory.

The following audio recordings can be accessed through the media center:

- Voice records
- Musical ring tones in the list of ring tones
- Audio recordings downloaded to your phone

Audio files supported by the Media Center include:

Format	Sampling Rates/Bit Rates
.au	8 KHz/8 kbps
.midi	8 KHz, Type 0
.mp3	8 KHz/192 kbps
.wav	8 KHz/64 kbps

Image files supported by the Media Center include:

Format	Max. Image Size (in pixels)
.png	640 x 480
.gif	640 x 480
.jpg	640 x 480

Format	Max. Image Size (in pixels)
.wbmp	127 x 127

use PTT Features

Your phone can send and receive the following items through Push To Talk calls with other phones that have this capability:

- Short text messages¹
- Pictures¹
- Datebook events
- My Info
- Contact information

You can choose to send My Info and contact information to any PTT ID.

You can choose to send pictures, messages, events to the PTT ID you are engaged in a Push To Talk call with, PTT IDs on the **Recent Calls** list, and PTT IDs stored in **Contacts**.

When you make or receive a Push To Talk call, your phone automatically determines whether the phone you are engaged in a Push To Talk call with is able to receive each of these items. Your phone saves this information for as long as the PTT ID is on your **Recent Calls** list or is saved in your **Contacts**. Your phone updates the saved information each time you make or receive a call to or from that PTT ID.

You can turn your phone's ability to send and receive messages, pictures, events on and off.

Note: You cannot send PTT feature items during Talkgroup calls.

1. Additional charges may apply.

send messages

Note: This feature requires a subscription. Please contact your sales representative or SouthernLINC Wireless at 1-800-406-0151.

The PTT Messages feature lets you send short text messages through Push To Talk calls.

When you send a message, it appears on the display of the phone you are engaged in the Push To Talk call with. The message won't be stored in the recent calls list.

The first time you send a message after turning the phone on, **Messaging Fees May Apply.** **Continue?** appears and you are prompted to respond.

begin a message and choose a recipient

You can begin a message during a Push To Talk call, from the **Contacts** list, the **Recent Calls** list, or from the **PTT Features**.

begin a message during a Push To Talk call:

While in a Push To Talk call, press > **PTT Feature** > **PTT Message**.

begin a message from the Contact or the Recent Calls list

- 1 From the **Contacts** or the **Recent Calls** list, select the entry containing the PTT ID you want to send the message to.
- 2 Press > **PTT Feature** > **PTT Message**.

begin a message from the PTT Features

The **PTT Features** lets you select the PTT ID you want to send the message to from **Contacts** or the **Recent Calls** list.

Find it:  > **PTT Features** > **PTT Message**

Then select **A Contact** or **A Recent Call** to see a list of entries from the **Contacts** or the **Recent Calls** list that can receive messages.

create messages

After you have begun a message and chosen a recipient, a screen appears that lets you create the text of the message you want to send. Your message may be up to 400 characters long.

You can choose from a list of ready-made words or short phrases called Quick Notes. You can use a Quick Note as it is or edit it before you send it. Editing a Quick Note

changes the Quick Note for this message only and will not change the Quick Note on the list.

send a completed message

After you have completed your message, press the PTT button to send it.

receive messages

When you receive a message, a message notification appears on the display. To view the message press .

To dismiss the message press  under **Dismiss**.

reply to a message

- 1 View the message.
- 2 Press  under **Reply**.
- 3 Create the message and press the PTT button to send it.

send pictures

Note: This feature requires a subscription. Please contact your sales representative or SouthernLINC Wireless at 1-800-406-0151.

You can send pictures stored in **Media Center** through Push To Talk calls. The picture you send appears on the Private call recipient's display.

If the recipient accepts the picture, their phone saves the picture.

The first time you send a stored picture after turning the phone on, **Picture Fees May Apply**. **Continue?** appears and you are prompted to respond.

Note: You cannot make or receive Push To Talk calls while transmitting or receiving a picture.

send a picture during a call

- 1 While in a Push To Talk call, press under **Picture** or press > **PTT Feature** > **PTT Picture**.

A list of pictures that can be included in a Push To Talk call appears.

- 2 Select the picture you want to send.
- 3 Press the PTT button to send the picture.
- 4 Wait while the picture is transmitted. The Push To Talk call is temporarily interrupted while a picture is transmitted.
- 5 When prompted, press the PTT button to resume the Push To Talk call.

start a call by sending a picture

from **Media Center**

Find it: > **Media Center**

- 1 Select the picture you want to send.

- 2** Press  > **Send Via...** > **PTT Picture**.
A list of contacts that have PTT IDs and are able to receive pictures appears.
- 3** Select the name of the person you want to send the picture to.
- 4** Press the PTT button to send the picture.
- 5** When prompted, press the PTT button to resume the Push To Talk call.

from the PTT Features:

Find it:  > **PTT Features** > **PTT Picture**

- 1** Select **A Contact**, or **A Recent Call** to see a list of entries that can receive pictures.
- 2** Select the entry containing the PTT ID you want to send the message to.
- 3** Select the picture you want to send.
- 4** Press the PTT button to send the picture.

- 5** Once picture has been sent, when prompted press the PTT button to resume the call.

receive a picture

When someone sends you a picture, your phone emits a tone or vibrates and a message appears asking if you want to accept the picture.

Pictures you receive are saved to your phone's memory. They are accessible through **Media Center**.

When you see a message asking if you want to accept the picture, press **Yes** to accept or **No** to decline.

Tip: If you want to stop the transmission before it is finished, press .

Note: The first time you accept a stored picture after turning the phone on, **Picture Fees May Apply. Continue?** appears and you are

prompted to respond. Press  under **Yes** to accept the picture.

clear a picture from the display

If you want to clear a picture from your phone's display while still on a call, press  > **Clear Screen**.

The picture will not appear on the display again the next time you receive a call from person who sent it. This does not delete the picture from **Media Center**.

send My Info

- 1 While in a Push To Talk call press  > **Send via PTT** and push the PTT button to send.
or
- 2 From the home screen press  > **My Info** >  > **Send via PTT** and push the PTT button to send.

set my info sending option

You can control what portion of the information in **My Info** is sent and whether it is sent automatically in every call or only when you choose to send it.

Find it:  > **PTT Features** > **Configure** > **PTT My Info** > **Info to Send**

- 1 Select or remove the fields you want to send.
- 2 Press  under **Done**.

The information your phone sends always includes **My Name** and **PTT ID**. You may also send **Line 1**, **Line 2**, **Carrier IP**, and **Circuit Data** depending on your sending options.

automatic sending

To control whether you send your information automatically:

Find it:  > **PTT Features** > **Configure** > **PTT My Info** > **Auto Send**

1 Select On or Off.

When you make a call in which your information is sent automatically, the name you entered in the **My Name** field of **My Info** appears on the display of the recipient's phone, even if your name and PTT ID are not stored in the recipient's Contacts.

send contact information

1 While in an Push To Talk call press  > **PTT Feature**.

2 Select **PTT Info** and select the contact information you want to send.

3 Push the PTT button to send.

or

1 From the home screen press  > **PTT Features** > **PTT Info**.

2 Enter the PTT ID number of the person you want to send the Contact information to or press  under **Browse**.

3 Select from **Recent Calls, Contacts, or Memo**.

4 Select the contact information you want to send and push the PTT button.

turn PTT features on and off

You can turn your phone's ability to send and receive messages, pictures, and Datebook events on and off.

You cannot turn your phone's ability to send and receive My Info and contact information on and off.

Find it:  > **PTT Features** > **Configure**

1 Select **On/Off Features**.

2 Check or uncheck **PTT Messages**, **PTT Pictures** and/or **PTT Events**.

3 Press  under **Done**.

one touch PTT

Find it:  > PTT Features > Configure >
One Touch PTT

One Touch PTT sets your phone to do any of the following each time you press the PTT button from the home screen:

option

Off: Nothing happens when you press the PTT button from the home screen.

Last Call: Call the most recent PTT ID or Group on the recent calls list.

Assigned No.: Call a PTT ID you assign. Enter the number using your keypad, or press  under **Search**. Select **Contacts**, **Recent Calls**, or **Memo**.

Note: If you are entering a Talkgroup number, enter  before the number.

PTT Features: Go to PTT Features. See "PTT Features" on page 32.

option

Send Message: Go to the first screen to send a message.

Send Picture: Go to the first screen to send pictures. See "send pictures" on page 28.

Send Event: Go the first screen to send a Datebook event.

Send My Info: Go to the first screen to send My Info. See "send My Info" on page 30.

Send Contacts: Go to the first screen to send a contact. See "send contact information" on page 31.

PTT Features

The **PTT Features** lets you quickly access PTT features, and other Push To Talk call features, from the main menu.

Find it:  > PTT Features

1 To send a PTT features item, select **Send Message**, **Send Picture**, **Send Event**, **Send My Info**, or **Send Contact**. After choosing what PTT item you are sending, select a contact and press the PTT button to send.

or

2 Select **Configure** to configure your **Quick Notes**, **Send My Info**, **One Touch PTT**, or **On/Off Features**.

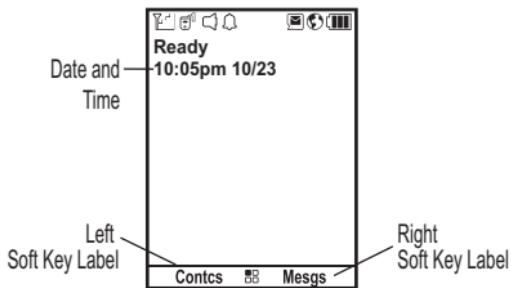

basics

See page 1 for a basic phone diagram.

display

The *home screen* shows when you turn on the phone. To dial a number from the home screen, press number keys and .

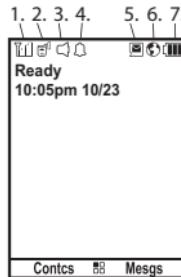

Note: Your home screen may look different.

Soft key labels show the current soft key functions. For soft key  locations, see page 1.

status indicators

Status indicators are shown at the top of the home screen:

- 1 **Signal Strength Indicator:** Vertical bars show the strength of the network

connection. You can't make or receive calls when 1 or 0 shows.

- 2 Active Phone Line:** 1 indicates phone line 1 is ready to make calls.
- 3 Speaker Off:** Sounds associated with Push To Talk Mobile to Mobile calls and Talkgroup calls are set to come through the earpiece rather than through the speaker.
- 4 Ringer On:** Your phone is set to ring.
- 5 Message Indicator:** Shows when you receive a text message. 
- 6 Packet Data:** Your handset is ready to transfer packet data or is transferring packet data.
- 7 Battery Charge Indicator:** A fuller battery indicates a greater charge. Recharge the battery when your phone shows **Low Battery**.

text entry

Some features let you enter text.

Your phone provides convenient ways to enter words, letters, punctuation, and numbers whenever you are prompted to enter text (for example, when adding a Contacts entry or when text messaging).

change the character input mode:

- 1** When you see a screen where you can enter text, press  to change the character input mode.

2 Select one of the following options:

entry modes	
Alpha	Press a key several times for each character.
Word	Enter words using a predictive text entering system that lets you enter a word with fewer keypresses.
Symbols	Enter symbols.
Numeric	Enter numbers by pressing the numbers on the keypad.
Languages	Lets you select the input language.
Signature	Inserts your stored signature (see page 19).

Tip: When entering text, press and hold **#** to change letter capitalization (**Abc** > **ABC** > **abc**).

word mode

Word English Text Input lets you enter text into your phone by pressing keys just once per letter.

Word English Text Input analyzes the letters you enter using an intuitive word database and creates a suitable word. (The word may change as you type.)

enter a word using Word Character Input:

- 1 Select the **Word** character input mode.
- 2 Press the corresponding keys once per letter to enter a word (for example, to enter the word **Jeff**, press **5 3 3 3**). (If you make a mistake, press **□** under **Delete** or ***** to erase a single character. Press and hold **□** under **Delete** or ***** to delete an entire entry.)

- 3 To accept a word and insert a space, press #.

alpha mode

enter characters by tapping the keypad:

- 1 Select the **Alpha** mode.
- 2 Press the corresponding keys repeatedly until the desired letter appears. (For example, to enter the word **Jeff**, press **5** once, **3** two times, **3** three times, and **3** three times again. If you make a mistake, press **>Delete** under **Delete** to erase a single character. Press and hold **Delete** under **Delete** to erase an entire entry.)

By default, the first letter of an entry is capitalized and the following letters are lowercased. After a character is entered, the cursor automatically advances to the next space after two seconds or when you enter a character on a different key.

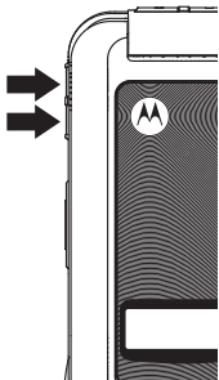

Characters scroll in the following order:

characters	
1	Space . 1 ? ! , @ & : ; " - () ' ¡ ¡ % £ \$ ¥
2	A B C 2 Á Ã Â À Ç
3	D E F 3 É Ê È
4	G H I 4 Í Ì
5	J K L 5
6	M N O 6 Ó Õ Ô Õ
7	P Q R S 7 ß
8	T U V 8 Ú Ü Û Ù
9	W X Y Z 9
0	+ - 0 * / \ [] = > < # §
#	Space
*	Back

volume

Press the volume keys up or down to:

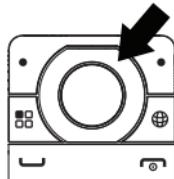

- turn off an incoming call alert
- change the earpiece volume during calls
- change the ringer volume from the home screen

Tip: You can quickly set your ringer to **Vibrate All** by holding the down volume key in the home screen.

navigation key

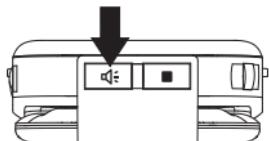

Press the *navigation key* up, down, left, or right to scroll to items in the display. When you scroll to something, press **OK**.

handsfree speaker

You can use your phone's hands-free speaker to make calls without holding the phone to your ear.

During a call press the speaker key to turn the hands-free speaker on.

The hands-free speaker stays on until you press the speaker key or end the call. The next phone

call will redirect the audio back to the earpiece.

transmitters

Note: Consult airline staff about the use of the *Transmitters* feature during flight. Turn off your phone whenever instructed to do so by airline staff.

Transmitters turns off your phone's calling features in situations where wireless phone use is prohibited, but you can use the phone's other non-calling features when Transmitters turned Off.

Find it:  >  > Advanced > Transmitters > Off

use GPS with map software

Your phone can be connected to a PC, laptop, or PDA via USB for use as GPS receiver. For more specific information on how to setup your phone for use with your computer please visit www.motorola.com/support and look under the FAQ section.

features for the hearing impaired

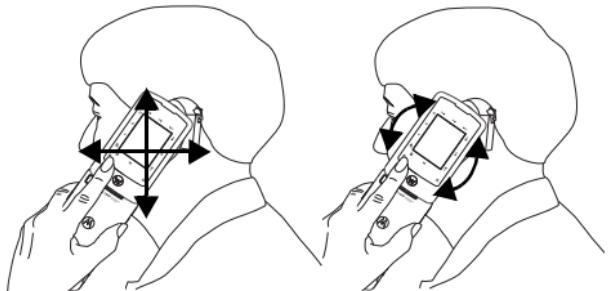

using your phone with a hearing aid

For best results use the following optimization procedures and handset setting. They generally apply as well for users with cochlear implants:

optimize your handset position and orientation

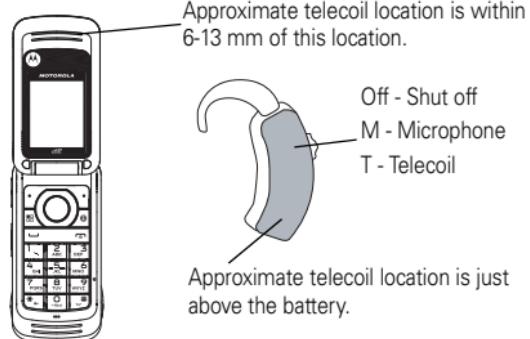

While in a phone call slide your phone up and down, then left and right until best microphone coupling is obtained. You also may need to adjust your hearing aid (HA) volume setting.

If your HA has a telecoil, activate its switch, then also rotate the handset as illustrated to align the telecoils.

Note: Some automatically switched hearing aids may need an auxiliary switching magnet.

If you are unsure whether your HA is telecoil equipped or needs an auxiliary magnet, please refer to your HA user guide or contact a hearing aid professional or supplier.

choose your hearing aid setting

Find it: > Settings > Phone Calls > Hearing Aid.

- 1 Set this option to **Microphone**. Microphone coupling is now optimized.

or

- 2** Set this option to **Telecoil**. Handset meets US federal requirements for telecoil coupling sound.
- or
- 3** Set this option to **Off** (factory default). This is the setting for non HA users.

calls

To make and answer calls, see page 14.

turn off a call alert

You can press the volume keys to turn off a call alert before answering the call.

recent calls

The **Recent Calls** list contains information associated with calls you have made and received and call alerts you have received.

When you send or receive Push To Talk calls, the Recent Call list contains the following PTT items with those calls:

- Messages
- Pictures

- Events
- My Info
- Contacts

The recent calls list displays up to 20 of the most recent calls and call alerts.

Find it:  > **Recent Calls**

Tip: You can also access the Recent Calls list by pressing the navigation key down.

- 1 Scroll through the list.
- 2 Highlight the item you want to view or perform some action on.
- 3 To view more details of the item press .

store an item to contacts from recent calls

Phone calls, Push To Talk calls, My Info received from other phones, or Contacts entries received from other phones can be stored to the Contacts list from the Recent Calls list.

Find it:  > Recent Calls

- 1 Scroll to or select the item you want to store.
- 2 Press  and select **Save** to store the information as a new entry in the Contacts list.
or
- 3 If **Save** is not one or your options, press  > **Update Contacts**. And select the contact you want to update.
- 4 Press  under **Save** to save your changes.

redial

To redial your last outgoing phone call, press and hold .

voice names

You can place calls by speaking commands to your phone if you have previously assigned a voice name to your contacts.

assign voice names to contacts

- 1 Press  under **Contcts** and select [**New Contact**].
- 2 Assign a name, phone number and select [**Options**].
- 3 Select **Voice Name** and follow the prompt to record the voice name.
- 4 Press  under **Back** and  under **Save** to save the entry.

place a call using voice command

- 1 From the home screen press and hold the speaker key  until you are prompted to say the voice name.

The handset will automatically place the call.

caller ID

Note: This feature requires a subscription. Please contact your sales representative or SouthernLINC Wireless at 1-800-406-0151.

Caller ID allows people to identify a caller before answering the phone by displaying the number of the incoming call. If you do not want your number displayed when you make a call, just follow these easy steps.

To block your phone number from being displayed for a specific outgoing call:

- 1 Press   .

- 2 Enter the number you want to call.

- 3 Press .

To permanently block your number, call SouthernLINC Wireless at 1-800-406-0151.

call forward

Call forwarding sends calls to the phone numbers you specify. You can forward all calls to one number or forward missed calls to different numbers depending on the reason you missed the call. You can forward phone lines 1 and 2 independently.

Find it:  > Call Forward

- 1 To forward all calls select **All Calls** and select **To** to enter the phone number you want all your calls forwarded to.

or

- 2** You can specify a forwarding number for each type of missed call by selecting **Detailed** and choosing the following options:

If Busy: When your handset is on a call or transferring data.

If No Answer: When you do not answer on the first 4 rings.

If Unreachable: When your handset is out of coverage or powered off.

emergency calls

SouthernLINC Wireless programs one or more emergency phone numbers that you can call under any circumstances, even when your phone is locked or the SIM card is not inserted.

Note: Emergency numbers vary by country. Your phone's preprogrammed emergency number(s) may not work in all locations, and

sometimes an emergency call cannot be placed due to network, environmental, or interference issues.

Your phone supports emergency calling. Emergency phone calls can be made even when your SIM card is blocked or not in your phone.

Dial 911 or your local emergency number to be connected to an emergency response center. If you are on an active call, you must end it before making an emergency call.

When you make an emergency call, your phone's GPS Enabled feature can help emergency service personnel find you, if you are in a location where your phone's GPS antenna has established a clear view of the open sky and your local emergency response center has the equipment to process location information. Because of the limitations of this feature, always provide your best knowledge

of your location to the emergency response center when you make an emergency call.

Note: Emergency calls cannot be placed while the keypad is locked.

Note: If you have not registered on the network, emergency calls cannot be placed while your SIM card is in your phone.

international calls

Note: This feature requires a subscription. Please contact your sales representative or SouthernLINC Wireless at 1-800-406-0151.

speed dial

Each phone number stored in Contacts is assigned a Speed Dial number, which you can use to call that number.

- 1 From the home screen, use the keypad to enter the Speed Dial number assigned to the phone number you want to call.
- 2 Press **#**.
- 3 Press **call**.

turbo dial

The first nine entries in your contacts are set for turbo dial. They can be called by pressing and holding the speed dial number (1 through 9).

voice mail

Note: To receive voice mail messages, you must first set up a voice mail account with SouthernLINC Wireless.

receive a message

When you receive a voice mail message, **New VoiceMail Message** appears on the display.

To check voicemail messages press  under **Call**.

To dismiss the message notification:

If the flip is closed, press the smart key  on the top.

If the flip is open, press , **Back**, or close the flip.

If the caller leaves a message, this icon  appears on the display, reminding you that you have a new message. Additionally, the Messaging LED indicator will light up.

Note: By default, the Messaging LED indicator will turn off after 30 seconds.

LINCaround

Note: This is an optional feature. Go to www.southernlinc.com/downloads or contact SouthernLINC Wireless at 1-800-406-0151 about its availability for purchase.

LINCaround allows direct two-way phone-to-phone communications between two or more phones equipped for LINCaround. You can make and receive LINCaround calls even when network service is not available. You can talk to anyone on your code and channel within your range.

Note: Range will vary based on terrain, man-made structures and atmospheric conditions.

LINCaround allows you to use code or private mode operation, use up to 10 channels and communicate with standalone LINCaround radios.

Note: LINCaround is not compatible with older Family Radio Services products.

The following features and main menu items will not be available while in LINCaround mode:

- On-network phone calls
- On-network Push To Talk Mobile to Mobile calls
- Data transmission
- Incoming message notification
- Musical ring tones
- Call forwarding
- Messages
- Call Timers
- Call alerts
- Voice records

set your phone to LINCaround

Find it:  > LINCaround > Go To LINCaround.

After a few seconds, the **LINCaround** idle screen appears. The channel you are set to appears on the first line of the display, the code you are set to appears on the second line of the display and **LA Ready** appears just above the softkeys.

Note: When switching from the network to **LINCaround**, the last channel and code that were set appear on the **LINCaround** idle screen.

While in **LINCaround**, this icon  appears on the display, indicating that there is no network signal and **LINCaround** is active.

Phones used in LINCaround mode should be a minimum of 6 feet apart to maximize performance and improve transmission range.

exit LINCaround

Find it:  > LA Options > Exit LINCaround.

The following message displays: **Switching to Network Please Wait** displays. After a few seconds, the network idle screen appears.

channels and codes

Your phone has 10 channels and 15 codes.

Channels are divided into sets of frequencies that allow you to make and receive LINCaround calls. Other parties may also be talking on the same channel.

Codes help minimize interference from unwanted messages and other disturbances when you are on the same channel as others.

To have a conversation, all parties must be on the same channel and code. For private LINCaround calls, the person you are calling

must be in LINCaround and set to the same channel to receive your call.

Note: When making a code call, all parties that are on your code and channel can hear your conversation.

set a channel

- 1 From the LINCaround idle screen, press  under **Edit**.
- 2 Scroll to **Channel** and press  under **Edit**.
- 3 Select a channel number from 1 to 10.
- 4 When you are finished, press  under **Back** to return to the LINCaround idle screen.

set a code

- 1 From the LINCaround idle screen, press  under **Edit**.
- 2 Scroll to **Code** and press  under **Edit**.

- 3** Select a code number from 1 to 15 or one of the following options:

option

Receive All

Sets your phone to receive LINCaround transmissions from any phone that is set to the same channel, regardless of the code (1-15). When you receive transmissions with the code set to **Receive All**, the display changes from **Receive All** to the code on which the transmission was received.

Tip: You can reply to an incoming call within 6 seconds after hearing the short ending beep by pressing the PTT button.

Note: You cannot initiate a code call when the code is set to **Receive All**. If you push the PTT button with the code set to **Receive All**, you will receive an error message.

option

Pvt Only

Allows you to have a private conversation with another person using LINCaround. When on a private LINCaround call, no other parties can hear your conversation. In order to make a private LINCaround call, you must use the valid 10-digit Personal Telephone Number (PTN) of the person you are calling. The person you are calling must be in LINCaround and set to the same channel to receive your call.

Note: An error message will occur if you don't use a valid PTN, or the person that you are trying to reach is not in LINCaround, or is set to a different channel or out of range.

- 4** When you are finished, press  under **Back** to return to the LINCaround idle screen.

make and receive code calls in LINCaround

To make a code call in LINCaround:

- 1** Push and hold the PTT button. **Transmit** appears on the first line of display. Begin speaking after your phone emits the LINCaround tone.
- 2** Release the PTT button to listen.

Note: The tone emitted from your phone when using LINCaround is 4 beeps and sounds different from the standard tone heard with on-network Push To Talk and Talkgroup calls.

You could receive an error message if there are no parties on your channel or code, or if you are out of range.

When you receive a code call using LINCaround, **Receive** appears on the first line of the display.

Note: An incoming LINCaround call can be terminated at any time by pressing .

make a private LINCaround call

- 1** Enter the 10-digit PTN of the person you want to call on your channel, or press  under **Contacts** and select a contact, or scroll to a number in the recent calls list.
- 2** Push and hold the PTT button. Begin speaking after your phone emits the LINCaround tone.
- 3** Release the PTT button to listen.

The number or name of the person you are calling will appear in the first line of the display.

receive a private LINCaround call

- 1** The number or name of the person who initiated the call will appear in the first line of the display.
- 2** You can reply within 6 seconds simply by pushing the PTT button.

end a private LINCaround call

A private LINCaround call will end if there is no communication for 6 seconds.

Note: A private LINCaround call may be interrupted during the 6 second idle time by another LINCaround code call or another private LINCaround call.

make emergency calls while in LINCaround mode

If you attempt to make an Emergency 911 call while in LINCaround mode, your phone will automatically exit LINCaround mode and attempt to find a network signal.

Note: If you are out of network coverage your phone will not be able to make an emergency 911 cellular call until you go back into the network coverage area.

You must wait until the phone reconnects to the network before attempting to make an emergency 911 cellular call.

setup options

LINCaround setup options are available in the LA Options screen in both network and LINCaround modes.

access setup options in network

Find it: ☎ > LINCaround > Setup.

access setup options in LINCaround

Find it: ☎ > LA Options > Setup.

The following options become available:

option
<p>Direct Launch</p> <p>Launches your phone directly into LINCaround when you select LINCaround from the main menu. If Direct Launch is set to On, you will not see LA Options when you select LINCaround from the main menu. In order to have access to your setup options, Direct Launch must be set to Off. Or you can access setup options while in LINCaround by pressing ☎ and selecting LA Options.</p>

option

State Tone

Notifies you periodically with a tone that you are in **LINCaround** mode. You can select a time frame during which you want to be notified that you are in **LINCaround** mode.

Select from **30 minutes, 1, 2, 3 or 4 hours**.

customize

ring tones

To set the ring tone your phone makes when you receive phone calls, call alerts, message notifications, pictures sent in Push To Talk calls, or Datebook reminders:

Note: Only ring tones stored in your phone's memory are available in the ring tones list. Not all audio files can be assigned as ring tones.

Find it:  > Ring Tones

- 1 Make sure **Vibrate All** is set to **Off**.
- 2 Scroll through the list of ring tones and select the one you want to assign. **Vibrate** sets your phone to vibrate instead of

making a sound; **Silent** sets your phone to neither vibrate nor make a sound.

Tip: Highlighting a ring tone lets you hear it.

- 3 Select the features you want to assign the ring tone to.
- 4 When you are finished, press **Done**.

Note: This icon  appears on the display if you set your phone to **Silent**. This icon  appears on the display if you set the phone to **Vibrate All**.

set your phone to vibrate

You can set your phone to vibrate instead of making a sound when you receive all phone calls, Push To Talk calls, Talkgroup calls, call

alerts, messages notifications, pictures sent in Push To Talk calls, and Datebook reminders.

Find it: > Ring Tones > Vibrate All

1 Set this option to **On** or **Locked**.

Setting this option to **On** lets you turn **Vibrate All** off by pressing the up volume control.

Setting this option to **Locked** requires you to press and hold the up volume control to turn **Vibrate All** off. The **Locked** option helps prevent you from accidentally turning **Vibrate All** off.

To set **Vibrate All** to **On** or **Locked** using the volume controls: Press the volume controls to turn down the volume as far as possible to set **Vibrate All** to **On**. Continue to hold the down volume control to set **Vibrate All** to **Locked**.

To set your phone to vibrate instead of making a sound for some features but not others:

Find it: > Ring Tones

- 1 Make sure **Vibrate All** is set to **Off**.
- 2 Select **Vibrate** from the list of ring tones.
- 3 Select the features you want to set to make no sound.
- 4 When you are finished, press  under **Done**.

wallpaper

Set a photo or picture as a wallpaper (background) image in your phone's home screen or throughout all menu screens.

Find it: > Settings > Display/Info > Wallpaper > Wallpaper.

To select a wallpaper image scroll through the list of pictures and press  to select the picture of your choice.

Note: You can set the wallpaper to change automatically after a certain period of time by

turning on the **Auto Cycle** feature located in the Wallpaper menu.

backlight

Set the amount of time that the display and java apps. backlights remain on, or turn off the backlight feature to extend battery life.

Find it:  > Settings > Display/Info > Backlight

LED indicators

You can turn off the Bluetooth and messaging indicators on the external display.

Find it:  > Settings > Display/Info > Backlight > Message LED > Off

datebook

Find it:  > Datebook >  > Setup

You can view or change these options:

option

Start View: Sets Datebook to start in day view, week view, or month view when you access Datebook.

Daily Begin: Sets the beginning of your day. This is the earliest time of day displayed in week view, if you have a 12-hour day view.

Delete After: Sets the amount of time Datebook waits to delete an event after it occurs.

Time Shift: Lets you shift the times of all Datebook events. This is useful if you are traveling to a different time zone.

Alert Timeout: Sets the amount of time a tone continues to sound when you receive a Datebook reminder.

Clock: Controls whether the time and date appear on the home screen; sets time and date format.

hide or show location information

Your phone is equipped with a Location feature for use in connection with location-based services that may be available in the future.

The Location feature allows the network to detect your position. Turning Location off will hide your location from everyone except for your local emergency response center.

Note: Turning Location on will allow the network to detect your position using GPS technology, making some applications and services easier to use. Turning Location off will disable the GPS location function for all purposes except 911, but will not hide your general location based on the cell site serving your call. No application or service may use your location without your request or

permission. GPS-enhanced 911 is not available in all areas.

set your privacy options

Find it: > GPS > Privacy

Select **Restricted**, **Unrestricted**, or **Ask Access**.

other features

advanced calling

feature
<p>call waiting</p> <p>Find it: To accept the second call and put the active call on hold press  under Yes.</p> <p>To accept the second call and end the active call press .</p> <p>Your phone rings with the second call for you to answer.</p>

feature
<p>3-way call</p> <p>Make or receive a phone call and press  > 3 Way. Enter the second phone number, press  and  under Join.</p> <p>Tip: For quick ways to enter the number, press  to see the dialing menu.</p> <p>You cannot make any other calls after you have joined a 3-way call, even if one party disconnects.</p>

handsfree

Note: The use of wireless phones while driving may cause distraction. Discontinue a call if you can't concentrate on driving. Additionally, the use of wireless devices and their accessories may be prohibited or restricted in certain areas. Always obey the laws and regulations on the use of these products.

feature
speaker-phone To activate the speakerphone while driving press and hold the speakerphone key 
auto answer To automatically answer calls when connected to a car kit or headset press  > Settings > Phone Calls > Auto Ans. Select the amount of rings before answering.

personalize

feature
language To set the language of your menu press  > Settings > Display/Info > Language .
backlight time length To select how long the display screen and keypad are backlit press  > Settings > Display/Info > Backlight .
menu style To show the Main Menu as graphic icons or a text-based list press  > Settings > Display/Info > Menu View .
clock display To display the clock on your home screen press  > Settings > Display/Info > Clock > Display > On .

pc applications

feature

other PC applications For a list of complete PC applications visit www.motorola.com/support

TTY

feature

turn On TTY feature From the home screen press [] > **Settings** > **Phone Calls** > **TTY** > **Use TTY** > **On**.

choose TTY mode From the home screen press [] > **Settings** > **Phone Calls** > **TTY** > **Type**.
Select from **TTY**, **VCO** or **HCO**.

feature

change the TTY baud rate From the home screen press [] > **Settings** > **Phone Calls** > **TTY** > **Baud**.
Select **45.45** or **50.00**.

change TTY mode during a call While in the TTY call, press [] > **In Call Setup** > **TTY** > **Type**.
Select from **TTY**, **VCO** or **HCO**.

security

feature

phone lock To lock the phone press [] > **Settings** > **Security** > **Phone Lock** > **Lock Now** or **Auto Lock**.

feature
keypad lock To lock the keypad press  > Settings > Security > Keypad Lock > Lock Now or Auto Lock . Shortcut: To lock the keypad press  >  .
enable SIM PIN To enable SIM PIN, press  > Settings > Security > SIM PIN > On .
change SIM PIN To change the SIM PIN, press  > Settings > Security > Change Passwds > SIM PIN .

Note: You can make emergency calls on a locked phone (see page 45).

Legal and Safety

Safety and General Information

This section contains important information on the safe and efficient operation of your mobile device. Read this information before using your integrated multi-service portable radio.*

Exposure to Radio Frequency (RF) Energy

Your mobile device contains a transmitter and receiver. When it is ON, it receives and transmits RF energy. When you communicate with your phone, the system handling your call controls the power level at which your phone transmits.

Your mobile device is designed to comply with local regulatory requirements in your country concerning exposure of human beings to RF energy.

Portable Radio Product Operation and EME Exposure

Your Motorola radio product is designed to comply with the following national and international standards and guidelines regarding exposure of human beings to radio frequency electromagnetic energy (EME):

- United States Federal Communications Commission, Code of Federal Regulations; 47 CFR part 2 sub-part J.
- American National Standards Institute (ANSI) / Institute of Electrical and Electronics Engineers (IEEE). C95. 1-1992.
- Institute of Electrical and Electronics Engineers (IEEE). C95. 1-2005 Edition.
- International Commission on Non-Ionizing Radiation Protection (ICNIRP) 1998.
- Ministry of Health (Canada). Safety Code 6. Limits of Human Exposure to Radio frequency Electromagnetic Fields in the Frequency Range from 3 kHz to 300 GHz, 1999.
- Australian Communications Authority Radio communications (Electromagnetic Radiation - Human Exposure) Standard 2003.
- ANATEL, Brazil Regulatory Authority, Resolution 303 (July 2, 2002) "Regulation of the limitation of exposure to

* The information provided in this document supersedes the general safety information in user's guides published prior to May 1, 2006

electrical, magnetic, and electromagnetic fields in the radio frequency range between 9 kHz and 300 GHz." "Attachment to Resolution 303 from July 2, 2002."

Operational Precautions

For optimal mobile device performance, and to be sure that human exposure to RF energy does not exceed the guidelines set forth in the relevant standards, always follow these instructions and precautions.

Phone Operation

When placing or receiving a phone call, hold your mobile phone as you would a landline telephone. **Speak directly into the microphone.**

Two-way radio operation

Your radio product has been designed and tested to comply with national and international standards and guidelines regarding human exposure to RF electromagnetic energy, when operated in the two-way mode (at the face, or at the abdomen when using an audio accessory) at usage factors of up to 50% talk/50% listen.

Transmit no more than the rated duty factor of 50% of the time. To transmit (talk), push the PTT button. To receive calls, release the PTT button. Transmitting 50% of the time or less, is important because this radio generates measurable RF energy only when transmitting (in terms of measuring for standards compliance).

When using your radio product as a traditional two-way radio, **hold the radio product in a vertical position with the microphone one to two inches (2.5 to 5 cm) away from the lips.**

If you wear the mobile device on your body, always place the mobile device in a Motorola approved clip, holder, holster, case or body harness. If you do not use a body-worn accessory supplied or approved by Motorola and are not using the mobile device in the intended use positions along side the head in the phone mode or in front of the face in the two-way radio mode, or if you hang your device from a lanyard around your neck, keep the device at least 2.5 centimeters (1 inch) from your body when transmitting.

Approved Accessories

For a list of approved Motorola accessories call 1-800-453-0920, or visit our website at www.motorola.com/phoneaccessories.

RF Energy Interference/Compatibility

Nearly every electronic device is subject to RF energy interference from external sources if inadequately shielded, designed or otherwise configured for RF energy compatibility. In some circumstances your mobile device may cause interference with other devices.

Follow Instructions to Avoid Interference Problems

Turn OFF your mobile device in any location where posted notices instruct you to do so.

In an aircraft, turn off your mobile device whenever instructed to do so by airline staff. If your mobile device offers an airplane mode or similar feature, consult airline staff about using it in flight.

Implantable Medical Devices

If you have an implantable medical devices, such as a pacemaker or defibrillator, consult your physician before using this mobile device.

Persons with implantable medical devices should observe the following precautions:

- ALWAYS keep the mobile device more than 20 centimeters (8 inches) from the implantable medical device when the phone is turned ON.
- DO NOT carry the mobile device in the breast pocket;
- Use the ear opposite the implantable medical device to minimize the potential for interference.
- Turn OFF the mobile device immediately if you have any reason to suspect that interference is taking place.

Read and follow the directions from the manufacturer of your implantable medical device. If you have any questions about using

your mobile device with your implantable medical device, consult your health care provider.

Hearing Aids

Some phones may interfere with some hearing aids. In the event of such interference, you may want to consult your hearing aid manufacturer or physician to discuss alternatives.

Other Medical Devices and Health Care Facilities

If you use any other personal medical devices, consult your physician or the manufacturer or your device to determine if it is adequately shielded from RF energy. Turn off your radio product when instructed to do so in hospitals or health care facilities that may be using equipment that is sensitive to external RF energy.

Caring for the Environment by Recycling

This symbol on a Motorola product means the product should not be disposed of with household waste.

Disposal of your Mobile Device and Accessories

Please do not dispose of mobile devices or electrical accessories (such as chargers, headsets, or batteries) with your household waste. These items should be disposed of in accordance with the national collection and recycling schemes operated by your local or

regional authority. Alternatively, you may return unwanted mobile devices and electrical accessories to any Motorola Approved Service Center in your region. Details of Motorola approved national recycling schemes, and further information on Motorola recycling activities can be found at: www.motorola.com/recycling

Disposal of your Mobile Device Packaging and User's Guide

Product packaging and user's guides should only be disposed of in accordance with national collection and recycling requirements. Please contact your regional authorities for more details.

Driving Precautions

The use of wireless phones while driving may cause distraction. Discontinue a call if you can't concentrate on driving.

Additionally, the use of wireless devices and their accessories may be prohibited or restricted in certain areas. Always obey the laws and regulations on the use of these products.

Responsible driving practices can be found in the "Smart Practices While Driving" section (see page 82).

Operational Warnings

Obey all posted signs when using Mobile devices in public areas.

Potentially Explosive Atmospheres

Areas with potentially explosive atmospheres are often but not always posted, and can include fueling areas such as below decks on boats, fuel or chemical transfer or storage facilities, or areas where the air contains chemicals or particles, such as grain, dust or metal powders.

When you are in such area, turn off your handset, and do not remove, install, or charge batteries unless it is a radio product type especially qualified for use in such areas as "Intrinsically Safe" (for example, Factory Mutual, CSA, or UL approved). In such areas, sparks can occur and cause an explosion or fire.

Symbol Key

Your battery, charger, or portable radio may contain symbols, defined as follows:

Symbol	Definition
	Important safety information follows.
	Do not dispose of your battery or phone in a fire.

Symbol	Definition
	Your battery or phone may require recycling in accordance with local laws. Contact your local regulatory authorities for more information.
	Do not throw your battery or phone in the trash.
	Your phone contains an internal lithium ion battery.
	Do not let your battery, charger, or phone get wet.
	Listening at full volume to music or voice through a headset may damage your hearing.

Batteries and Chargers

Caution: Improper treatment or use of batteries may present a danger of fire, explosion, leakage, or other hazard. For more information, see the "Battery Use and Battery Safety" section in this user's guide.

Keep Your Mobile Device and Its Accessories Away from Small Children

These products are not toys and may be hazardous to small children. For example:

- A choking hazard may exist for small, detachable parts.
- Improper use could result in loud sounds, possibly causing hearing injury.
- Improperly handled batteries could overheat and cause a burn.

Glass Parts

Some parts of your mobile device may be made of glass. This glass could break if the product is dropped on a hard surface or receives a substantial impact. If glass breaks, do not touch or attempt to remove. Stop using your mobile device until the glass is replaced by a qualified service center.

Seizures/Blackouts

Some people may be susceptible to epileptic seizures or blackouts when exposed to flashing lights, such as when playing video games. These may occur even if a person has never had a previous seizure or blackout.

If you have experienced seizures or blackouts, or if you have a family history of such occurrences, please consult with your physician before playing video games or enabling a flashing-lights feature (if available) on your mobile device.

Discontinue use and consult a physician if any of the following symptoms occur: convulsion, eye or muscle twitching, loss of awareness, involuntary movements, or disorientation. It is always a good idea to hold the screen away from your eyes, leave the lights on in the room, take a 15-minute break every hour, and stop use if you are very tired.

Caution About High Volume Usage

Warning: Warning: Exposure to loud noise from any source for extended periods of time may affect your hearing. The louder the volume sound level, the less time is required before your hearing could be affected. To protect your hearing:

- Limit the amount of time you use headsets or headphones at high volume.
- Avoid turning up the volume to block out noisy surroundings.
- Turn the volume down if you can't hear people speaking near you.

If you experience hearing discomfort, including the sensation of pressure or fullness in your ears, ringing in your ears, or muffled speech, you should stop listening to the device through your headset or headphones and have your hearing checked.

For more information about hearing, see our Web site at www.motorola.com/hearingsafety (in English only).

Repetitive Motion

When you repetitively perform actions such as pressing keys or entering finger-written characters, you may experience occasional discomfort in your hands, arms, shoulders, neck, or other parts of your body. If you continue to have discomfort during or after such use, stop use and see a physician.

Service and Repairs

If you have questions or need assistance, we're here to help.

Go to www.motorola.com/support, where you can select from a number of customer care options. You can also contact the Motorola Customer Support Center at 1 (800) 453-0920 (United States), 1 (877) 483-2840 (TTY, TDD United States for hearing impaired).

Export Law Assurances

This product is controlled under the export regulations of the United States of America and Canada. The Governments of the United States of America and Canada may restrict the exportation or re-exportation of this product to certain destinations. For further information contact the U.S. Department of Commerce or the Canadian Department of Foreign Affairs and International Trade.

Battery Use and Safety

- **Motorola recommends you always use Motorola-branded batteries and chargers.**

The warranty does not cover damage caused by non-Motorola batteries and/or chargers.

Caution: Use of an unqualified battery or charger may present a risk of fire, explosion, leakage, or other hazard. Improper battery use, or use of a damaged battery, may result in a fire, explosion, or other hazard.

- Battery usage by children should be supervised.
- **Important:** Motorola mobile devices are designed to work best with qualified batteries. If you see a message on your display such as **Invalid Battery** or **Unable to Charge**, take the following steps:
 - Remove the battery and inspect it to confirm it bears a Motorola "Original Equipment" hologram;
 - If there is no hologram, the battery is not a qualified battery;
 - If there is a hologram, replace the battery and retry charging it;
 - If the message remains, contact a Motorola Authorized Service Center.
- When storing your battery, keep it in a cool, dry place.

- It is normal over time for battery life to decrease, and for the battery to exhibit shorter runtime between charges or require more frequent or longer charging times.

Important: Handle and store batteries properly to avoid injury or damage. Most battery issues arise from improper handling of batteries, and particularly from the continued use of damaged batteries.

DON'Ts

- **Don't disassemble, crush, puncture, shred, or otherwise attempt to change the form of your battery.**
- **Don't let the phone or battery come in contact with water.** Water can get into the phone's circuits, leading to corrosion. If the phone and/or battery get wet, have them checked by your carrier or contact Motorola, even if they appear to be working properly.
- **Don't allow the battery to touch metal objects.** If metal objects, such as jewelry, stay in prolonged contact with the battery contact points, the battery could become very hot.
- **Don't place your battery near a heat source.** Excessive heat can damage the phone or the battery. High temperatures can cause the battery to swell, leak, or malfunction. Therefore:
- Do **not** dry a wet or damp battery with an appliance or heat source, such as a hair dryer or microwave oven.

- Avoid leaving your phone in your car in high temperatures.

Dos

- **Do avoid dropping the battery or phone.** Dropping these items, especially on a hard surface, can potentially cause damage.
- **Do contact your service provider or Motorola if your phone or battery has been damaged from dropping or high temperatures.**

Important: Use Motorola Original products for quality assurance and safeguards. To aid consumers in identifying authentic Motorola batteries from non-original or counterfeit batteries (that may not have adequate safety protection), Motorola provides holograms on its batteries. Consumers should confirm that any battery they purchase has a "Motorola Original" hologram.

Motorola recommends you always use Motorola-branded batteries and chargers. Motorola mobile devices are designed to work with Motorola batteries. If you see a message on your display such as **Invalid Battery** or **Unable to Charge**, take the following steps:

- Remove the battery and inspect it to confirm that it has a "Motorola Original" hologram;
- If there is no hologram, the battery is not a Motorola battery;
- If there is a hologram, replace the battery and retry charging it;

- If the message remains, contact a Motorola authorized service center.

Important: Motorola's warranty does not cover damage to the phone caused by non-Motorola batteries and/or chargers.

Warning: Use of a non-Motorola battery or charger may present a risk of fire, explosion, leakage, or other hazard.

Proper and safe battery disposal and recycling: Proper battery disposal is not only important for safety, it benefits the environment. Consumers may recycle their used batteries in many retail or service provider locations. Additional information on proper disposal and recycling may be found on the Web:

- www.motorola.com/recycling
- www.rbrc.org/call2recycle/ (in English only)

Disposal: Promptly dispose of used batteries in accordance with local regulations. Contact your local recycling center or national recycling organizations for more information on how to dispose of batteries.

Warning: Never dispose of batteries in a fire because they may explode.

Battery Charging

Notes for charging your phone's battery:

- When charging your battery, keep it near room temperature. Never expose batteries to temperatures below 0°C (32°F) or above 45°C (113°F) when charging.

- New batteries are not fully charged.
- New batteries or batteries stored for a long time may take more time to charge.
- Motorola batteries and charging systems have circuitry that protects the battery from damage from overcharging.

Specific Absorption Rate

Your model wireless phone meets the governmental requirements for exposure to radio waves.

Your mobile device is a radio transmitter and receiver. It is designed and manufactured to not exceed limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. Government and by the Canadian regulatory authorities. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed for the safety of all persons, regardless of age or health, and to account for any variations in measurements.

The exposure standard for mobile devices employs a unit of measurement known as the Specific Absorption Rate (SAR). The SAR limit set by the FCC and by the Canadian regulatory authorities is 1.6 watts per kilogram (W/kg), averaged over one gram of tissue. Tests for SAR are conducted using procedures

accepted by the FCC and by Industry Canada with the mobile device transmitting at its highest certified power level in all tested frequencies. Although the SAR is determined at the highest certified power level, the actual SAR level of the mobile device while operating can be below the maximum value. This is because the mobile device is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station, the lower the power output.

Before a mobile device is available for sale to the public in the U.S. and Canada, it must be tested and certified to the FCC and Industry Canada that it does not exceed the limit established by each government for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) submitted to the FCC and available for review by Industry Canada. The highest SAR value for this mobile device when tested for use at the ear is 0.72 W/kg, and when worn on the body, as described in this guide, is 1.03 W/kg. Body-worn measurements can differ, depending upon available accessories and regulatory requirements. The SAR information includes the Motorola testing protocol, assessment procedure, and measurement uncertainty range for this product.

While there may be differences between the SAR levels of various mobile devices and at various positions, they meet the governmental requirements for safe exposure. Please note that improvements to this product model could cause differences in the SAR value for later products; in all cases, products are designed to be within the guidelines.

Additional information on SAR can be found on the Cellular Telecommunications & Internet Association (CTIA) Web site:

<http://www.phonefacts.net>

or the Canadian Wireless Telecommunications Association (CWTA) Web site:

<http://www.cwta.ca>

AGPS and Emergency Calls

When you make an emergency call, your mobile device can use *Assisted Global Positioning System* (AGPS) satellite signals to tell the emergency response center your approximate location.

The AGPS feature has limitations, so always tell the emergency response center your best knowledge of your location. Remain on the phone for as long as the emergency response center instructs you.

AGPS **might not work** for emergency calls, if your local emergency response center does not process AGPS location information. For details, contact your local authorities.

If your mobile device cannot find strong AGPS satellite signals, the location of the nearest cell tower in contact with your mobile device is automatically provided to the emergency response center.

AGPS Performance Tips

- Go outside and away from underground locations, covered vehicles, structures with metal or concrete roofs, tall buildings, and foliage. Indoor performance might improve if you move closer to windows, but some window sun shielding films can block satellite signals.
- Move away from radios, entertainment equipment, and other electronic devices that might interfere with or block AGPS satellite signals.

AGPS uses satellites controlled by the U.S. government and subject to changes implemented in accordance with the Department of Defense AGPS user policy and the Federal Radio Navigation Plan. These changes might affect AGPS performance.

Motorola Limited Warranty for the United States and Canada

What Does this Warranty Cover?

Note: FOR iDEN SUBSCRIBER PRODUCTS, ACCESSORIES AND SOFTWARE PURCHASED IN THE UNITED STATES OR CANADA

Subject to the exclusions contained below, Motorola, Inc. warrants its Motorola iDEN Digital Mobile and Portable Handsets ("Products"), Motorola-branded or certified accessories sold for use with these Products ("Accessories") and Motorola software

contained on CD-Roms or other tangible media and sold for use with these Products ("Software") to be free from defects in materials and workmanship under normal consumer usage for the period(s) outlined below. **This limited warranty is a consumer's exclusive remedy, and applies as follows to new Products, Accessories and Software purchased by consumers in the United States or Canada, which are accompanied by this written warranty:**

Products Covered	Length of Coverage
Products as defined above.	One (1) year from the date of purchase by the first consumer purchaser of the product.
Accessories as defined above.	One (1) year from the date of purchase by the first consumer purchaser of the product.
Products or Accessories that are Repaired or Replaced.	The balance of the original warranty or for ninety (90) days from the date returned to the consumer, whichever is longer.
Software as defined above. Applies only to physical defects in the media that embodies the copy of the software (e.g. CD-ROM, or floppy disk).	Ninety (90) days from the date of purchase.

What is not covered? (Exclusions)

Normal Wear and Tear. Periodic maintenance, repair and replacement of parts due to normal wear and tear are excluded from coverage.

Ornamental Decorations. Ornamental decorations such as emblems, graphics, rhinestones, jewels, gemstones and their settings, and other decorative elements, are excluded from coverage.

Batteries. Only batteries whose fully charged capacity falls below 80% of their rated capacity and batteries that leak are covered by this limited warranty.

Abuse & Misuse. Defects or damage that result from: (a) improper operation, storage, misuse or abuse, accident or neglect, such as physical damage (cracks, scratches, etc.) to the surface of the product resulting from misuse; (b) contact with liquid, water, rain, extreme humidity or heavy perspiration, sand, dirt or the like, extreme heat, or food; (c) use of the Products or Accessories for commercial purposes or subjecting the Product or Accessory to abnormal usage or conditions; or (d) other acts which are not the fault of Motorola, are excluded from coverage.

Use of Non-Motorola Products and Accessories. Defects or damage that result from the use of Non-Motorola branded or certified Products, Accessories, Software or other peripheral equipment are excluded from coverage.

Unauthorized Service or Modification. Defects or damages resulting from service, testing, adjustment, installation, maintenance, alteration, including without limitation, software

changes, or modification in any way by someone other than Motorola, or its authorized service centers, are excluded from coverage.

Altered Products. Products or Accessories with (a) serial numbers or date tags that have been removed, altered or obliterated; (b) broken seals or that show evidence of tampering; (c) mismatched board serial numbers; or (d) nonconforming or non-Motorola housings, antennas, or parts, are excluded from coverage.

Communication Services. Defects, damages, or the failure of Products, Accessories or Software due to any communication service or signal you may subscribe to or use with the Products, Accessories or Software is excluded from coverage.

Software Embodied in Physical Media. No warranty is made that the software will meet your requirements or will work in combination with any hardware or software applications provided by third parties, that the operation of the software products will be uninterrupted or error free, or that all defects in the software products will be corrected.

Software NOT Embodied in Physical Media. Software that is not embodied in physical media (e.g. software that is downloaded from the internet), is provided "as is" and without warranty.

Who is covered? This warranty extends only to the first consumer purchaser, and is not transferable.

What will Motorola Do? Motorola, at its option, will at no charge repair, replace or refund the purchase price of any Products, Accessories or Software that does not conform to this warranty.

We may use functionally equivalent reconditioned/refurbished/pre-owned or new Products, Accessories or parts. No data, software or applications added to your Product, Accessory or Software, including but not limited to personal contacts, games and ringer tones, will be reinstalled. To avoid losing such data, software and applications please create a back up prior to requesting service.

How to Obtain Warranty Service or Other Information? To obtain service or information, please call:

Motorola iDEN Customer Services 1-800-453-0920 or
954-723-4910

TTY-877-483-2840

Or visit us online at <http://www.motorola.com/iden>

You will receive instructions on how to ship the Products, Accessories or Software, at your expense, to a Motorola Authorized Repair Center. To obtain service, you must include: (a) a copy of your receipt, bill of sale or other comparable proof of purchase; (b) a written description of the problem; (c) the name of your service provider, if applicable; (d) the name and location of the installation facility (if applicable) and, most importantly; (e) your address and telephone number.

What Other Limitations Are There? ANY IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, SHALL BE LIMITED TO THE DURATION OF THIS LIMITED WARRANTY, OTHERWISE THE REPAIR, REPLACEMENT, OR REFUND AS PROVIDED UNDER THIS EXPRESS

LIMITED WARRANTY IS THE EXCLUSIVE REMEDY OF THE CONSUMER, AND IS PROVIDED IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED. IN NO EVENT SHALL MOTOROLA BE LIABLE, WHETHER IN CONTRACT OR TORT (INCLUDING NEGLIGENCE) FOR DAMAGES IN EXCESS OF THE PURCHASE PRICE OF THE PRODUCT, ACCESSORY OR SOFTWARE, OR FOR ANY INDIRECT, INCIDENTAL, SPECIAL OR CONSEQUENTIAL DAMAGES OF ANY KIND, OR LOSS OF REVENUE OR PROFITS, LOSS OF BUSINESS, LOSS OF INFORMATION OR DATA, SOFTWARE OR APPLICATIONS OR OTHER FINANCIAL LOSS ARISING OUT OF OR IN CONNECTION WITH THE ABILITY OR INABILITY TO USE THE PRODUCTS, ACCESSORIES OR SOFTWARE TO THE FULL EXTENT THESE DAMAGES MAY BE DISCLAIMED BY LAW.

Some states and jurisdictions do not allow the limitation or exclusion of incidental or consequential damages, or limitation on the length of an implied warranty, so the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights, and you may also have other rights that vary from state to state or from one jurisdiction to another.

Laws in the United States and other countries preserve for Motorola certain exclusive rights for copyrighted Motorola software such as the exclusive rights to reproduce and distribute copies of the Motorola software. Motorola software may only be copied into, used in, and redistributed with, the Products associated with such Motorola software. No other use, including without limitation disassembly of such Motorola software or

exercise of the exclusive rights reserved for Motorola, is permitted.

Patent and Software Provisions:

MOTOROLA will defend, at its own expense, any suit brought against the end user purchaser to the extent that it is based on a claim that the Product or parts infringe a patent, and Motorola will pay those costs and damages finally awarded against the end user purchaser in any such suit which are attributable to any such claim, but such defense and payments are conditioned on the following:

- That MOTOROLA will be notified promptly in writing by such purchaser of any notice of such claim;
- That MOTOROLA will have sole control of the defense of such suit and all negotiations for its settlement or compromise; and
- Should the Product or parts become, or in MOTOROLA'S opinion be likely to become, the subject of a claim of infringement of a patent, that such purchaser will permit MOTOROLA, at its option and expense, either to procure for such purchaser the right to continue using the Product or parts or to replace or modify the same so that it becomes non infringing or to grant such purchaser a credit for the Product or parts as depreciated and accept its return. The depreciation will be an equal amount per year over the lifetime of the Product or parts as established by MOTOROLA.

MOTOROLA will have no liability with respect to any claim of patent infringement which is based upon the combination of the Product or parts furnished hereunder with software, apparatus or devices not furnished by MOTOROLA, nor will MOTOROLA have any liability for the use of ancillary equipment or software not furnished by MOTOROLA which is attached to or sued in connection with the Product or any parts thereof. In no event shall MOTOROLA be liable for any incidental, special or consequential damages arising from any claim of patent infringement or alleged infringement.

Laws in the United States and other countries preserve for MOTOROLA certain exclusive rights for copyrighted MOTOROLA software, such as the exclusive rights to reproduce in copies and distribute copies of such MOTOROLA software. MOTOROLA software may be used in only the Product in which the software was originally embodied and such software in such Product may not be replaced, copied, distributed, modified in any way, or used to produce any derivative thereof. No other use including, without limitation, alteration, modification, reproduction, distribution, or reverse engineering of such MOTOROLA software or exercise or rights in such MOTOROLA software is permitted. No license is granted by implication, estoppel or otherwise under MOTOROLA patent rights or copyrights.

Hearing Aid Compatibility With Mobile Phones

Some Motorola phones are measured for compatibility with hearing aids. If the box for your particular model has "Rated for Hearing Aids" printed on it, the following explanation applies.

When some mobile phones are used near some hearing devices (hearing aids and cochlear implants), users may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference noise, and phones also vary in the amount of interference they generate.

The wireless telephone industry has developed ratings for some of their mobile phones, to assist hearing device users in finding phones that may be compatible with their hearing devices. Not all phones have been rated. Phones that are rated have the rating on their box or a label on the box.

The ratings are not guarantees. Results will vary depending on the user's hearing device and hearing loss. If your hearing device happens to be vulnerable to interference, you may not be able to use a rated phone successfully. Trying out the phone with your hearing device is the best way to evaluate it for your personal needs.

M-Ratings: Phones rated M3 or M4 meet FCC requirements and are likely to generate less interference to hearing devices than phones that are not labeled. M4 is the better/higher of the two ratings.

T-Ratings: Phones rated T3 or T4 meet FCC requirements and are likely to be more usable with a hearing device's telecoil ("T Switch" or "Telephone Switch") than unrated phones. T4 is the better/higher of the two ratings. (Note that not all hearing devices have telecoils in them.)

Hearing devices may also be measured for immunity to this type of interference. Your hearing device manufacturer or hearing health professional may help you find results for your hearing device. The more immune your hearing aid is, the less likely you are to experience interference noise from mobile phones.

Information From the World Health Organization

Present scientific information does not indicate the need for any special precautions for the use of mobile phones. If you are concerned, you may want to limit your own or your children's RF exposure by limiting the length of calls or by using hands-free devices to keep mobile phones away from your head and body.

Source: WHO Fact Sheet 193

Further information: <http://www.who.int/peh-emf>.

Product Registration

Online Product Registration:

www.motorola.com/us/productregistration

Product registration is an important step toward enjoying your new Motorola product. Registering permits us to contact you for product or software updates and allows you to subscribe to updates on new products or special promotions. Registration is not required for warranty coverage.

Please retain your original dated sales receipt for your records. For warranty service of your Motorola Personal Communications Product you will need to provide a copy of your dated sales receipt to confirm warranty status.

Thank you for choosing a Motorola product.

Wireless: The New Recyclable

Your wireless phone can be recycled. Recycling your phone reduces the amount of waste disposed in landfills and allows recycled materials to be incorporated into new products.

The Cellular Telecommunications Industry Association (CTIA) and its members encourage consumers to recycle their phones and have taken steps to promote the collection and environmentally sound recycling of end-of-life devices.

As a phone user, you have an important role in ensuring that this device is recycled properly. When it comes time to give this phone up or trade it in for a new one, please remember that the phone, the charger, and many of its accessories can be recycled. It's easy. To learn more about CTIA's Recycling Program for Used Wireless Devices, please visit us at:

<http://recycling.motorola.young-america.com/index.html>

California Perchlorate Label

Some mobile phones use an internal, permanent backup battery on the printed circuit board that may contain very small amounts of perchlorate. In such cases, California law requires the following label:

Perchlorate Material - special handling may apply. See www.dtsc.ca.gov/hazardouswaste/perchlorate.

There is no special handling required by consumers.

Patent and Trademark Information

Software Copyright Notice

Motorola products may include copyrighted Motorola and third party software stored in semiconductor memories or other media. Laws in the United States and other countries preserve for Motorola and third party software providers certain exclusive rights for copyrighted software, such as the exclusive rights to distribute or reproduce the copyrighted software. Accordingly, any copyrighted software contained in the Motorola products may not be modified, reverse-engineered, distributed, or reproduced in any manner to the extent allowed by law. Furthermore, the purchase of Motorola products shall not be deemed to grant either directly or by implication, estoppel, or otherwise, any license under the copyrights, patents, or patent applications of Motorola or any third party software provider, except for the normal, non-exclusive, royalty-free license to use that arises by operation of law in the sale of a product.

Privacy and Data Security

Motorola understands that privacy and data security are important to everyone. Because some features of your mobile device may affect your privacy or data security, please follow these recommendations to enhance protection of your information:

- **Monitor access**—Keep your mobile device with you and do not leave it where others may have unmonitored access. Lock your device's keypad where this feature is available.

- **Keep software up to date**—If Motorola or a software/application vendor releases a patch or software fix for your mobile device that updates the device's security, install it as soon as possible.
- **Erase before recycling**—Delete personal information or data from your mobile device prior to disposing of it or turning it in for recycling. For instructions on how to delete all personal information from your device, please contact your local service provider.
- **Understanding AGPS**—To provide location information for emergency calls, certain Motorola mobile devices incorporate Assisted Global Positioning System (AGPS) technology. AGPS technology also can be used in non-emergency applications to track and monitor a user's location—for example, to provide driving directions. Users who prefer not to permit such tracking and monitoring should avoid using such applications.

If you have further questions regarding how the use of your mobile device may impact your privacy or data security, please contact Motorola at privacy@motorola.com, or contact your service provider.

obey them. The use of these devices may be prohibited or restricted in certain areas—for example handsfree use only. Go to www.motorola.com/callsmart (in English only) for more information.

Your mobile device lets you communicate by voice and data—almost anywhere, anytime, wherever wireless service is available and safe conditions allow. When driving a car, driving is your first responsibility. If you choose to use your phone while driving, remember the following tips:

- **Get to know your Motorola mobile device and its features such as speed dial and redial.** If available, these features help you to place your call without taking your attention off the road.
- **When available, use a handsfree device.** If possible, add an additional layer of convenience to your phone with one of the many Motorola Original handsfree accessories available today.
- **Position your mobile device within easy reach.** Be able to access your phone without removing your eyes from the road. If you receive an incoming call at an inconvenient time, if possible, let your voice mail answer it for you.
- **Let the person you are speaking with know you are driving; if necessary, suspend the call in heavy traffic or hazardous weather conditions.** Rain, sleet, snow, ice, and even heavy traffic can be hazardous.

Smart Practices While Driving

Drive Safe, Call SmartSM

Check the laws and regulations on the use of phones and their accessories in the areas where you drive. Always

- **Do not take notes or look up phone numbers while driving.** Jotting down a “to do” list or going through your address book takes attention away from your primary responsibility, driving safely.
- **Dial sensibly and assess the traffic; if possible, place calls when your car is not moving or before pulling into traffic.** If you must make a call while moving, dial only a few numbers, check the road and your mirrors, then continue.
- **Do not engage in stressful or emotional conversations that may be distracting.** Make people you are talking with aware you are driving and suspend conversations that can divert your attention away from the road.
- **Use your mobile device to call for help.** Dial 911 or other local emergency number in the case of fire, traffic accident, or medical emergencies (wherever wireless phone service is available).
- **Use your mobile device to help others in emergencies.** If you see an auto accident, crime in progress, or other serious emergency where lives are in danger, call 911 or other local emergency number (wherever wireless phone service is available), as you would want others to do for you.
- **Call roadside assistance or a special non-emergency wireless assistance number when necessary.** If you see a broken-down vehicle posing no

serious hazard, a broken traffic signal, a minor traffic accident where no one appears injured, or a vehicle you know to be stolen, call roadside assistance or other special non-emergency wireless number (wherever wireless phone service is available).
